## MAGNETIC SENSOR CSM - 2 Series

### GENERAL CHARACTERISTICS

- Magnetic sensor for linear and angular reading.
- Resolutions up to 1  $\mu\text{m}$ .
- Contactless reading.
- Extremely easy and fast mounting of the entire measuring system, with wide alignment tolerances.
- Small size, to allow installation in narrow spaces.
- Magnetic band composed by a magnetized plastoferrite tape, with pole pitch 5+5 mm. The plastoferrite is supported by a stainless steel tape, already provided with the adhesive tape, for an easy application on the machine.
- To be used with magnetic band CP200 or CP200Z (with reference indexes positioned upon request).

### MECHANICAL AND ELECTRICAL CHARACTERISTICS

<p><b>MECHANICAL</b></p> <ul style="list-style-type: none"> <li>• Magnetic sensor with die-cast body.</li> <li>• Possibility to fix the magnetic sensor with M4 screws or with through M3 screws.</li> <li>• Wide alignment tolerances.</li> </ul> <p><b>ELECTRICAL</b></p> <ul style="list-style-type: none"> <li>• Very flexible power cable.</li> <li>• Reading through positioning sensor based on magneto resistance, with AMR effect (Magnetic Anisotropy).</li> <li>• High signal stability.</li> <li>• Electrical protection against inversion of power supply polarity and short circuits on output port.</li> <li>• For applications where the maximum speed exceeds 1 m/s, it is necessary to use a cable <b>suited for continuous movements</b>.</li> </ul> <p>• <b>CABLE:</b> As a standard, the sensor is supplied with the following cable: - 8-wire shielded cable <math>\varnothing = 6.1</math> mm, PVC external sheath, with low friction coefficient, oil resistant; - Conductors section: power supply 0.35 mm<sup>2</sup>; signals 0.14 mm<sup>2</sup>.</p> <p>PUR cable or cable with reduced section on request.</p> <p><b>The cable's bending radius should not be lower than 60 mm.</b></p> <table border="1" style="width: 100%; text-align: center;"> <thead> <tr> <th>LINE DRIVER</th> <th>PUSH-PULL</th> <th>CONDUCTOR COLOR</th> </tr> </thead> <tbody> <tr><td>A</td><td>A</td><td>Green</td></tr> <tr><td><math>\bar{A}</math></td><td></td><td>Yellow</td></tr> <tr><td>B</td><td>B</td><td>Grey</td></tr> <tr><td><math>\bar{B}</math></td><td></td><td>Pink</td></tr> <tr><td><math>I_0</math></td><td><math>I_0</math></td><td>Blue</td></tr> <tr><td><math>\bar{I}_0</math></td><td></td><td>Red</td></tr> <tr><td>+ V</td><td>+ V</td><td>Brown</td></tr> <tr><td>0 V</td><td>0 V</td><td>White</td></tr> <tr><td>SCH</td><td>SCH</td><td>Shield</td></tr> </tbody> </table> <p>As a standard, the sensor is supplied with a 2-m cable. <b>Weight</b>	45 g																																																																								

\* Cable extensions need to have a 0.5 mm<sup>2</sup> section for power supply conductors.

\*\* With 1,000  $\mu\text{m}$  resolution, the constant step is 4 mm.

\*\*\* To obtain the declared accuracy values, it is necessary to respect the alignment tolerances prescribed by the Manufacturer. Better accuracy can be obtained by reducing the gap between the sensor and the magnetic band.

\*\*\*\* The indicated speeds are referred to a maximum frequency of 300 kHz.
